

Remember that each week you have tools you can use! Don't forget the instructions, map and Trail Guide.

Your final code:

Don't mix up the letters until you have all 12!

You'll find the medallion in a rosy corner of the property.

--	--	--	--	--	--	--	--	--	--	--	--

12) Translate that binary to find the "clue". You don't have to walk too far for this. Look at the property on the map. Is there a binary trail you can take?
 11) Try saying it out loud with another person in the room.
 10) Balancing the chemical reaction, you'll be frustrated to find that two answers exist. Did you head to Post 7?
 9) Why is this clue numbered differently? The numbers we gave you in the colored boxes obviously didn't help solve the puzzle. Do they make more sense if you look at the instruction sheets?
